

## Features

Focusing on the value and difference we could deliver, ARIA is designed and developed from ground up together with professional caregivers.

### Relatable & Localised Content

Familiar images and videos promote play among local seniors

### Elderly-Friendly Interface

Designed with seniors in mind for ease of use and accessibility.

### Applicable to Home & Community Settings

ARIA can be played anywhere anytime, solo or in a group setting.

## About the Team

We are a diverse team, comprising of therapists, designers, and engineers. We are inclusive and embrace neurodiversity, involving young adults with autism in this project.

## TRAMPOLENE

Trampoline Limited is a research & technology-driven non-profit organization. We invent solutions to bring about social change.

# ARIA

Alive Reminiscence  
Through Interactive  
Augmented Reality

Social Innovation for Elderly -  
Technology to bring about new  
experience of interacting with the  
past and the present.

## Pleasant Memories

Some of the seniors miss the good old days at home, or places they were familiar with.

They may want to listen to old songs, or head out to shop at old stores.

They may not be able to go out, due to disability or dementia.

## Rekindle the Moment

ARIA uses local contents that seniors find familiar and are more keen to explore and interact with.

Family can play ARIA with the senior, anywhere anytime.

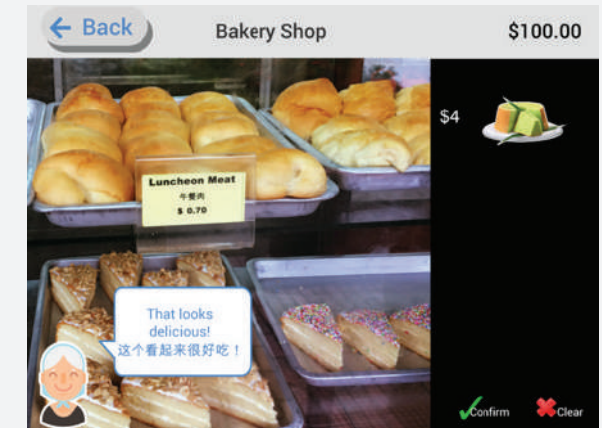

A group of seniors play ARIA at the community centre. Let's reignite the nostalgic moment!

## Let's Play

Designed with seniors in mind, for ease of use and accessibility.

Other than re-experiencing the good memories, the gameplay also stimulates cognitive skills, and sharpens one's focus and mental state.
